

Custom Box

Need to test following points in custom box:

Responsiveness:

- Need to check the whole website design responsiveness for all screen.

Buttons:

- The boxes button of whole website will be transparent background with white border and text colour.
- When button hovers the background colour will be yellow and text colour white.

Sections alignment:

- Each section will be align horizontally and vertically.

Note!

These are all same changes for the whole website pages, if any page have a different styles than others then kindly mention it.
